HASHI / CHAISE À BASCULE, Federica Biasi

Rocking chair with iroko structure and steel frame, treated for the outdoors. The Accardi Outdoor Jacquard technical fabric, which wraps and envelops the iroko wood elements at the bottom and at the top, is a sustainable, lightweight, waterproof fabric carefully crafted by artisan weavers. The result creates a textured pattern that blends harmoniously with the wooden structure with irregular cross-section, once again highlighting the reference to Japonisme and the local craft tradition.

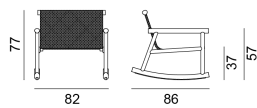

Iroko: Iroko wood is a particularly hard species from the forests of tropical Africa. Being a resinous wood, it is naturally protected against water and moisture. It features impressive mechanical qualities, such as resistance to bending. Iroko wood used for this collection is a solid wood stabilized in drying ovens and oiled afterwards.

Accardi Jacquard fabric: The Accardi Jacquard fabric is a high technical content fabric crafted by skilled textile artisans. With a polyester soul and a PVC covering, it is waterproof, resistant to UV rays, durable, lightweight and easy to clean. It is also anti-algae, anti-bacterial, anti-mould and non-toxic breathable.
