EIDOS / TABLE,
Gabriele & Oscar Buratti

The rectangular tables combine geometric elements with different thicknesses, covered with a semi-gloss resin in bright colours with a cloudy effect. GFRC concrete bases, marine plywood top, semi-gloss resin finish.

Polyurethane foam: Tops made from two carbon fibre and polyurethane foam panels. The surface is coated with a thin layer of semi-gloss resin with cloudy effect finishing: the final chromatic effect is irregular and shows differences in tone. As these products are handmade, differences are possible in comparison with both the photographed models and the delivered samples. The irregularity of the cloudiness is therefore to be considered as a peculiar part of this finish.
